

Haomei supplies a range of quality alloys (AA8011, AA3105) and tempers (H14, H16, H24, H26) for a wide variety of closure applications in packaging industries, such as Beverage, Food, Pharmaceutical/Medical, Pesticide, Health Care, etc.

Haomei aluminum closure sheet is rolled to very fine tolerances to yield more closure per tonne of stock and to allow uninterrupted operation of high-speed, multiple-cavity presses. Its strength, high formability, low earring and printable surfaces make it ideal for pilfer-proof caps and vial seals.

Haomei thin aluminium sheet have excellent deep-drawing capabilities and lacquer adhesion, making sure the highest quality printing of drawings and designs, giving an impressive finish.

The sensitive surface nature of aluminium closure sheets makes it imperative in the surface design. As a results, every sheet supplied must be completely flat to guarantee superb results when lacquering, enhancing our clients' production efficiency.

Haomei aluminium Closure Sheets are suitable for both transparent and non-transparent lacquering, and will not bend during curing process. For applications requiring deep drawing, such as long caps, Haomei aluminium closure sheet show very low earring, greatly reducing scrap rate for our clients.

The production of aluminum closure sheets is integrated in Haomei's rolling system, providing best closure sheets for packaging industry. Continuous annealing, tension leveling, conversion and electro-static protection ensure superior behavior in elongation and adhesion and a perfect condition for lacquering and drawing.

Haomei also employs a number of processes to achieve our clients' desired results - for example, the DOS re-oiling process that enables the handling of sheets without scratching and optimal lacquer adhesion.

Alloy	8011, 3105
Temper	H14, H16, H24, H26
Thickness	0.15~0.25 mm (+/-0.005mm)
Width	500~1000 mm (+0.5mm, -0mm)
Length	500~1000 mm (+0.5mm, -0mm)
Coil	500~1000 mm

Strip	20~500 mm
Surface	mill finished, printed, lacquered, chromated, DOS
Diagonal	≤ 1mm

#### Chemical Compositions

8011/3105

Alloy	Fe	Si	Cu	Mn	Mg	Cr	Zn	Ni	Ti	Other		Al
										Each	Total	
8011	0.60 ~1.0	0.50 ~0.9	0.1	0.2	0.05	0.05	0.1	-	0.08	0.05	0.15	Remain
3105	0.7	0.6	0.3	0.3 ~0.8	0.2 ~0.8	0.2	0.4	-	0.1	0.05	0.15	Remains

#### Mechanical Property for Continuous Casting

Alloy	Temper	Thickness (mm)	U.T.S (Mpa)	Elongation (%)
8011	H14	0.15~0.25	185~205	≧ 2

#### Mechanical Property for Direct Casting

Alloy	Temper	Thickness (mm)	U.T.S (Mpa)	Elongation (%)
8011	H14	0.15~0.25	125~155	≧ 2
3105	H14	0.15~0.25	150~200	≧ 1

## packing and delivery

### Aluminum Closure Sheets/Coils Packing

Aluminum Closure Sheets are placed in wooden boxes on wooden skids with runners along the length of the sheet. They are wrapped in HDPE with hardboard on top and bottom of the stack. Hoop iron strapping runs along the length of the sheets. Silica gel packets are put in the boxes for moisture protection.

Alternatively, they are wrapped in a poly-laminated gunny or polythene, strapped with a hoop iron strap and clip and placed on a wooden pallet. Edge guards are used and the sheets are wrapped with protective thermocol sheets.

Coil: Coil is placed on wooden pallets in either eye-to-sky or eye-to-wall condition, wrapped in HDPE fabric and hardboard, and strapped with hoop iron. Silica gel packets are used for moisture protection.

Wooden case: approx. 700~800kgs per case  
approx. 2000pcs per case  
size of wooden case is made as per the sheet size

### Aluminium Sheet for Closure Applications

We would like to introduce haomei's thin aluminium sheet(alloy 8011A,3105) to you, the first choice for your closure products-- **ropp caps, PP cap, pilfer proof cap, screw cap, caps and closures, aluminum cap, aluminium closure**. Please take a minute to familiarise yourself with haomei's capabilities, and we hope they demonstrate our suitability for being your preferred supplier.

Haomei thin aluminium sheet have excellent deep-drawing capabilities and lacquer adhesion, making sure the highest quality printing of drawings and designs, giving an impressive finish.

### **Aluminium closure sheets / coils**

Aluminium closure sheets / coils for the bottle cap market. Customers use our aluminium sheet to manufacture the caps for long neck wine bottles, plus a range of pilfer proof caps for beverage bottles,soft drink, juice, isotonic beverage, energy beverage, and other products.

## **About us**

Aluminum for packaging plays a fundamental role, which is to protect, distribute and display goods. Without packaging, food spoils, fragile products get broken and distribution becomes hazardous. The entire supply chain becomes hugely inefficient. Aluminum packaging is part of the solution and essential for sustainable growth.

We would like to highlight our **aluminium closure sheet,8011 thin aluminium sheet for caps and closures, aluminium Closure Stock,aluminium lacquered,printed aluminium sheets with good quality and competitive price bottle cap material** ,Haomei aluminium closure sheet show very low earring, greatly reducing scrap rate for our clients.

Thin Aluminum sheet is the ideal material for the production of bottle closures due to its light weight, recyclability, superior barrier qualities, good formability and bright finish for decoration.

Haomei Aluminum is a global supplier of aluminum sheets, which is used to produce aluminum caps & closures. The aluminum sheet and coils are used in the manufacture of products ranging from screw caps, pilferproof caps (PP caps), beer caps, bottle caps for medicines, can/jar caps, flip off caps/seals, etc.

So far Haomei Aluminum has been shipping to United States, Canada, Brazil, Chile, Mexico, Columbia, Argentina, Germany, UK, Italy, Spain, Bulgaria, Netherlands, Serbia, Ukraine, Saudi Arabia, UAE, Iran, Bangladesh, Tunisia, Algeria, Nigeria, South Africa, Ghana, India, Vietnam, Thailand, Korea, Singapore, Indonesia, Philippines, Australia, New Zealand, etd, more than 60 countries all over the world.

Haomei always provides clients with quality products and reasonable price, because always

looks forward to cooperating with clients on the basis of mutual benefit and common development.
